

Naveen DG

Python Developer | Full-Stack & Machine Learning Engineer

naveendg101@gmail.com | 9944566476 | linkedin.com/in/naveen-d-g | github.com/naveen-d-g

Professional Summary

Python Developer with a strong foundation in Full-Stack Web Development and Machine Learning, focused on building scalable and secure applications. Proficient in developing RESTful APIs and backend services using Flask, along with API integration and authentication mechanisms. Hands-on experience in AI/ML workflows including data preprocessing and model training, with a strong focus on backend system design and machine learning model development.

Skills

Programming & Development: Python, Java, HTML, CSS, JavaScript, C/C++

Databases: MySQL, PostgreSQL

Tools: Git/GitHub, Postman, Kafka, Selenium, Nmap

Frameworks & Libraries: Flask, Django, REST APIs, React.js, PyTorch, TensorFlow, Scikit-learn, XGBoost, Pandas

Internships

Python Developer Intern, Vivid Trans-Tech Solutions Pvt. Ltd., 06/2025 – 07/2025 | Chennai

- Developed AI-based translation features supporting text, speech, image and document inputs using Python.
- Implemented OCR pipelines to extract and process text from images and PDF documents.
- Integrated translation APIs and built Python-based GUI components for multilingual translation workflows.

Python Fullstack Internship, Bonton Softwares Pvt. Ltd., 01/2026 – 03/2026 | Chennai

- Developed a ML-based bot detection system (TRUST ENGINE) for anomaly detection and behavioral analytics.
- Designed and deployed Flask REST API endpoints serving real-time ML inference, integrating automated session termination on threat detection.
- Implemented real-time event streaming via Kafka and WebSocket-based dashboards, enabling live behavioral analytics and sub-second monitoring updates.

Projects

LangBridge – Multimodal Multilingual Translator 

- Developed a Python application supporting 100+ languages across text, speech, image and PDF translation with AI-powered automatic language detection.
- Integrated OCR, text-to-speech, and Microsoft Translator API, achieving 92–95% OCR accuracy with PDF/DOCX.
- Implemented text-to-speech output, translation history logging and export functionality to PDF and DOCX formats via a user-friendly GUI.

Trust Engine – Autonomous Digital Trust & Resilience 

- Developed an AI-driven SOC platform using Flask, React, and ML models for real-time bot detection and behavioral analytics.
- Developed an ML-based bot detection system using Random Forest, Isolation Forest, and XGBoost, integrating Nmap-based attack monitoring and automated threat response workflows for proactive security enforcement.
- Built real-time monitoring dashboards with WebSockets and integrated automated threat response workflows.

Education

Bachelor of Engineering in Computer Science and Engineering, 11/2022 – 04/2026 | Tiruvannamalai
Arunai Engineering College
GPA: 7.78

Language Proficiency

- English
- Tamil
- Telugu
- Hindi
